since 1992

Environmental Policy of TERA d.o.o. Tolmin

At our company, environmental protection is not just a legal obligation; it is a core value and an integral part of our business strategy. We are fully aware of our impact on the planet, which is why we actively co-create a green future through responsible actions.

We turn our principles into reality through the following pillars:

- **Comprehensive Environmental Impact Management:** We continuously identify, monitor, and manage the environmental aspects of our operations, warehousing, and logistics, while striving for continuous improvement.
- **Measurability and Transparency:** We regularly measure and analyze key environmental indicators (energy consumption, waste, etc.) and implement immediate corrective actions in the event of deviations.
- **Regulatory Compliance:** We strictly comply with all environmental laws, regulations, and standards.
- **Circular Economy and Resources:** We actively promote reuse, recycling, the use of recycled materials, and waste reduction through the principles of sustainable design and separate waste collection.
- **Efficient and Rational Resource Management:** We manage energy, water, and raw materials responsibly, while actively investing in energy efficiency and process optimization.
- **Green Partnership:** We work closely with our suppliers and customers to co-develop environmentally preferable materials and solutions.
- **Culture of Sustainability and Awareness:** We foster environmental responsibility among our employees and actively engage all contractors, third-party providers, and business partners operating on our behalf in our sustainability commitments.
- **Aligning with Industry Trends:** We support initiatives within the polymer industry that promote decarbonization, emission reduction, and the sustainable use of plastic materials.
